I don't think the data base has any (or very few) comedies made outside the U.S.

Either need to lose the spaces without movies (year) or move 1 up or 1 down. Otherwise earlier movies are less likely to be in the sample.

Took runtime from Wikipedia

Note: One of the selected movies was a tv miniseries (240 min)

Next time: Just select 40, then go up or down if hit a cell with no movie; or revise list

Some movies had no data; go up or down one
